Professional Summary

Full-Stack Developer at Jio Platforms, building scalable, secure, and high-performance applications using MERN stack. Proven track record in improving system throughput by **40%** and reducing feature delivery time by **15%**. Proficient in RESTful APIs, Form.io integration, and enterprise-grade authentication (**JWT**, **OAuth2**, **SAML**). Strong focus on clean code, scalability, and cross-functional collaboration.

Technical Skills

- **Programming Languages:** JavaScript, Python
- **Frontend :** React.js, Next.js
- **Backend :** Node.js, Express.js, RESTful APIs,, Microservices
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** VS Code, Git, GitHub, Postman, Azure DevOps

Education

Bachelor of Technology in Computer Science

Aug 2019 – May 2023

Poornima University

- SGPA: 8.01

Experience

Software Development Engineer 1

Dec 2023 –Present

JIO Platforms Limited

- Designed and developed scalable **RESTful APIs** using Node.js and Express.js, which led to a 40% improvement in system throughput and better request handling during peak loads.
- Integrated a dynamic **form-rendering system** using Form.io, enabling secure submissions and real-time data validation for internal business workflows.
- Built reusable, modular **React.js components**, significantly improving frontend maintainability and reducing feature delivery time by 15% through consistent UI practices.
- Implemented secure authentication using **JWT**, **Passport.js**, and SAML (Oracle IDCS), enhancing user login security across systems.
- Worked within cross-functional Agile teams to deliver full-stack solutions, combining React interfaces with Node-based REST APIs and implementing protected route logic.
- Engineered a **Next.js** application with SSO integration using Oracle IDS and SAML authentication, enhancing security.

Projects

AI-Powered Personal Finance Management System

- Developed a full-stack web application with the help of **React.js** and **Node.js** to help users manage finances by providing personalized budget plans based on salary, expenses.
- Integrated **Gemini API** to generate personalized financial suggestions based on salary, expense, and profile inputs for bachelors and married individuals, ensuring tailored financial planning
- Implemented **JWT-based user authentication** and route protection with role-based access control.

Bug Tracker

- Designed a full-stack web application **bug tracking system** with the help of **React.js** and **Node.js** enabling testers to raise bugs and admins/developers to manage them efficiently.
- Implemented **role-based authentication** using **JWT** and protected routes for secure access control.
- Designed a scalable **RESTful backend** in supporting bug creation, assignment, status updates.
